An Ironworker in the leather industry

It is a great pleasure for me to share with you the story of my journey until today to now work in leather industry for Ironworkers needs

Over the years, I alternated working as an Ironworker and leather craftsman, Making horse Harnesses, Garments leather, Leashes and dog Collars With a great experience in these two fields of activities I was in a perfect position to improve Ironworker gears, especially Belts.

By adding a great deal of Creativity, and being very self-motivated by the essential need to lighten belts in their entirety and to obtain a better layout of utility space ...We finally got very good results.

From there came the creation of the patented principle specific to Ironworker Belt, and then, adding in an progressive way, ergonomic and fonctionnal tool holders. Through users appreciation, the final product is unanimously considered to be a winning combination by Ironworkers

Now we can offer products to meet real expectations, on a daily basis.

In the same time, the company was founded and my Wife Noela found the perfect fitting name in association : Cuir à Fer Inc "Yes" a Great Hit " ! I would say

Thereafter, Noela also designed the final but essential missing element by realizing a meaningful Logo that represents the true values of Ironworkers A " real Home Run" ! No doubt Great Teamwork !

In the same direction, the valuable support of Local 711 and the several Brother - Ironworkers who solidarily, both locally and globally, has been invaluable and has contributed greatly to the succes of our business

A huge Thanks to all of you, and so, our wonderful story continues!

On our part, my Wife and I, are very pleased to offer a parallel and necessary service to meet the growing needs of Ironworkers in the steel Industry. We look forward to serving you

Thank you for your time and have a great day!
